

**Summary report
on the results of the conducted trainings
in Chuy, Issyk-Kul, Naryn, Jalal-Abad, Osh and Batken regions**

The Public Association "Resource Center for the Elderly" within the educational component of the project organized trainings in 6 regions of the Kyrgyz Republic for local activists, members of Small Public Councils, representatives of local communities, NGOs and their partners from the public sector and bodies of local government.

Trainings in each region of the Kyrgyz Republic were conducted during 2 days which began with an introduction of the trainers and participants, the provision of information in general about the project, its goals and objectives. At the end of the plenary session the participants were introduced to the format of the training and distributed according to a pre-compiled list of relevant training sessions:

Training topics	Trainer's name
"Informational and communicational technologies in country and community developing"	Aldakulova B. Larionov K.
"Small public councils' participation in improving the quality and accessibility of public and municipal services"	Tretyakov A. Kaseeva N.
"Country development strategy and diversity management at the level of local government in the interests of the citizens"	Bogatyrev V. Baltagulov J. Madeyuev A.N.

In trainings in 6 regions of the KR were attended by 456 participants, 34 % of them are men, 66% are women. The total actual attendance of participants in all trainings was 101% of the pre-planned number.

Based on the results of the trainings conducted in 6 regions of the KR and on the basis of the training materials, the expert group developed a "Guidebook on the development of the activities of Small Public Councils in the Kyrgyz Republic" which is intended for people interested in the creation and development of Small Public Councils, promoting citizens' interests and developing projects and development programs at the local level. The guidebook includes a number of methodological materials, the task is to assist in the development of local development strategies.

The conducted training activities in 6 regions of the country have shown their effectiveness and have become a pre-requisite for the activation of the existing public councils and members of the Small Public Councils. This is due to the adoption of decisions of the SPC on reanimating the activities of PC and determining the main priority areas of activity which are fixed the development of short-term development plans.

All activities included in the Public Councils development plans will form the basis for the development of projects for mini grants of the GSI project, the implementation of which will allow achieving long-term and sustainable results for public councils of the state bodies in Bishkek and small public councils in the regions of the Kyrgyz Republic.
